

# MT-1722 Fiber Suspension Clamp (P-clamp)

## Quick Details

1. Model No:MT-1722
2. Brand:Melontel
3. Application:FTTH system
4. Type:Drop wire clamp
5. Material:ABS body +stainless steel ring
6. Size:126\*34.5\*19mm
7. N.W.:25g
8. Package:50pcs/bag

## Description

Drop wire fish clamp also called fish clamp is developed to tension round and flat optical fiber cable on last mile FTTH routes of outdoor fiber optic cable deployment. Drop wire fish clamp is made of UV resistant and weather proved thermoplastic. The wire bail directly injected into the body that guarantee the confidence during deployment of overhead drop fiber cable. No parts will drop off from the clamp. Fiber optic tension clamp fish is one from the proper mechanical strength to the installed cable that will prevent the cable damages under external mechanical damages.

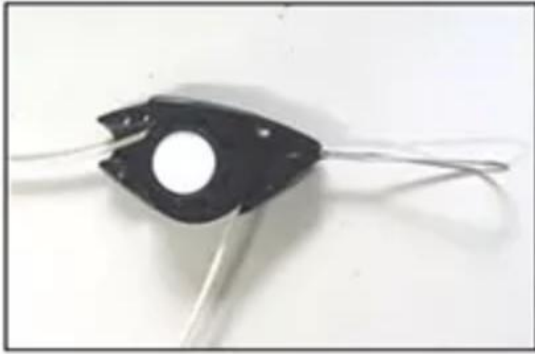

## Feature

1. Good anti-corrosion performance
2. High strength and wear resistant
3. Easy installation
4. Durable

## Uasge

Fish clamp FTTH,can be used in anchoring,turning,suspension optical fiber cable routes.

Without Suspension Wire

(in case of fiber optics diameter is /3.3mm\*2.0mm):2 turns

With Suspension Wire

(in case of fiber optics diameter is /5.0mm\*2.0mm):2 turns
